

TotalCMS provides an integrated environment for developing, managing, and delivering personalized learning content. TotalCMS increases productivity by enabling rapid content creation and delivery by a wide range of content creators including instructional designers and subject matter experts. Personalized, adaptive learning content increases learning retention and decreases time spent in training.

Rapid content creation for faster delivery

- Compelling, highly personalized learning experiences are delivered to the web in a fraction of the time taken by conventional tools
- Manage development and deployment of content
- Quickly search and locate content from other courses or organizations

Easy-to-use open authoring

- Both instructional designers and subject matter experts can contribute to learning content without the need to learn proprietary authoring tools
- Create and edit content using popular web authoring tools such as Macromedia Dreamweaver, Microsoft Front Page, PowerPoint and Word

Powerful assessment capabilities to evaluate performance

- Create powerful HTML-based assessments and evaluations without programming or scripting
- Choose from a rich array of built-in question types, including true/false, multiple choice, single and multiple fill-in-the-blank, image map, and un-judged essays
- Utilize advanced assessment settings, including flexible database driven question pooling, skipping, randomization, timed response and auto advance

Robust repository services to allow global collaboration

- Geographically dispersed course developers can share and manage content, leveraging design time features such as sophisticated search, version control, and check-in and check-out

Unparalleled, adaptive content delivery capabilities

- Provide a deep personalized learning experience and real-time remediation through dynamically adapting content delivery, based on the navigation and interactivity rules
- Deliver to tens of thousands of users, including external, with no impact on the learning management system (LMS)
- Deliver hybrid-learning activities that combine online content and CD-ROM or hard drive-based multi-media
- AICC/SCORM-compliant content can be imported and leveraged for creating custom online courses

Unique tracking and LMS integration capabilities to improve learning performance

- Integrate seamlessly with TotalLMS™ for reliable content connectivity, security, session management, SCORM packaging, and integrated reporting
- Interoperate with any LMS based on standard (AICC/SCORM) interfaces
